The GAS PAK PRO

The New All-In-One Portable Natural Gas Drying System

As the industry leader in deliquescent drying technology, Van Gas Technologies has designed a new portable solution for natural gas dehydration. This complete PLD skid package, is the perfect solution for jobs on the go. The Gas Pak PRO is custom built to your natural gas dehydration needs. Start by filling out the application specifications and then select your options. We will do the rest.

STANDARD FEATURES:

- Completely portable forklift accessible skid
- Custom built to your specifications
- PLD Series Dryer with hammer union closure
- OSHA Platform, ladder and dual swing safety gate for safe and easy desiccant refilling
- Afterfilter
- No moving parts, no electricity necessary
- 10 year deliquescent dryer vessel warranty

The GAS PAK PRO is ideal for:

- Offshore Natural Gas Dehydration
- Emergency Shutdown Dryers
- Fuel Gas
- Sales Gas
- Instrumentation

PACKAGE OPTIONS

Magnetrol Level Switch

High Level Alarm monitors liquid level in the reservoir.

Pressure Gauge

Ashcroft liquid filled gauges are more reliable than dry gauges.

Purge Vent Valve

Allows user to safely depressurize the dryer.

PDI with manifold

Measures the differential pressure between the inlet and outlet of the filter.

Emergency Bypass Valve

Bypass valves piping and assembly makes adding desiccant and changing elements easier.

Modco closure

Quick opening closure for both Deliquescent Dryers and Filters.

Jerguson liquid level gauge

Provides a visual indication of the liquid condensate inside the deliquescent dryer.

Relief valve assembly

Automatically relieves the pressure in the dryer if the pressure increases beyond the set pressure.

Build your GAS PAK *PRO*

Natural Gas Dehydration made simple with your own customized Gas Pak PRO. The industry's first portable natural gas dehydration system, built specifically for your needs. Fill out the form below, with the options you would like included. One of our Gas Specialists will review your request and provide you a quote for your Gas Pak PRO system.

Application Specifications:

Dryer Sizing _____

Flow needed _____

Pressure _____

Temperature _____
