

Introducing our new SUPER Dry-O-Lite Desiccant

New SUPER Dry-O-Lite performs better than in SP in High Temperatures!

Our Dry-O-Lite desiccant is the industry-leading, deliquescent desiccant for compressed air. It's was our first chemical drying agent specifically formulated for Van Air Systems Single Tower Deliquescent Dryers and Natural Gas Pipeline Dryers. Our SP desiccant was formulated primarily for the dehydration of natural gas. We took these two desiccants and formulated a new desiccant... **Super Dry-O-Lite**. Super Dry-O-Lite will meet or exceed the performance to our SP desiccant and has a higher temperature threshold.

FEATURES

Operating temperatures 100°F & Lower

Environmentally Friendly

Up to 45.7°F Dew Point Suppression

Prevents gas line freeze-ups

DESICCANT APPLICATIONS:

- Works best in High Pressure - Low Temperature Applications
- High Performance Air Applications
- Sales Gas, Fuel Gas & Biogas Dehydration
- Pretreat dryer in multi-stage Dehydration System

Dense tablet, no dust. *Deliquescent desiccants are environmentally safe and we guarantee performance!*

Available in Quarter 1 of 2024!
